Professional Summary

Since beginning my dental career in 1993, I have been able to acquire much knowledge and skill set at advanced levels of education. Thus I have acquired leadership, clinical, and administrative skills. These have developed with the demands of an ever growing dental/health care industry. I am very motivated to continue to grow my clinical and administrative and coaching knowledge while sharing my knowledge, experience, and creativity.

Highlights of Skills

- Strong and passionate about development of and maintenance of interpersonal relationships with fellow teammates, industry leaders, and most importantly patients!
- Trusted Team Member with confidential, and HIPPA requirements.
- Knowledgeable in all aspects of general, cosmetic, neuromuscular, orthotic,surgical,implant, prosthetic - analog and digital dentistry.
- Knowledgeable in development, design , and dental lab fabrication of removable and fixed prosthetics.
- Task and Challenge Driven
- Passionate about building teams and creating a positive, productive, and motivating culture.

Education

Perry - Lecompton High School / High School Diploma

1987-1991

General Studies

Journalism

Las Vegas Institute for Advanced Dental Studies, Arrowhead Dental Lab, Spear Online Education Seminars

LVI- 1999-2007. Arrowhead- 2009-2012. Spear- throughout the years

Accomplishments

In the Fall 2015 issue of Aesthetic Dentistry Magazine I was honored to be asked to write an article that shared my own personal full mouth reconstruction journey. I was then given the privilege to be on the cover of that issue as well. I am very grateful for the dentistry I have received that was so life changing for me. This in return has allowed me to share my journey and relate to my many patients over the years. I have been honored to watch a patient accept treatment because they want a pretty smile like mine, or they want to be healthy, or whatever their reason may be. This has been one of the most rewarding gifts I have received from dentistry.

Skills

- All aspects of general dentistry: restorative, endo, ortho (traditional and Invisalign), perio, cosmetic, full mouth reconstruction, orthotic, sleep, nutrition.

 - Impeccable Record Taking
 - Dental Photography Expert
-

Professional Experience

Contractor With Implant Centers, Salt Lake City, UT – Lead Prosthetic Tech and Clinical

Team Lead July 2020 - November 2020

- This startup company hired me to lead up the clinical and prosthetic division, as well as being the lead prosthetic tech in the Utah Centers. I was also on the leadership team that hired and trained the new team, as well as set up several of the new locations.

Legends Dental, Lawrence, KS – Lead Assistant and Smile

Designer August 2009 - March 2020

- In this practice I was lead assistant, smile designer, and prosthetic technician. I specialized in utilizing my cosmetic and neuromuscular occlusal training to enhance my work with implant retained and removable prosthetics. In this practice I was able to obtain a lot of conversion of traditional denture to fixed provisional experience, and smile design expertise.
- This practice was a mixture of starting out as family/cosmetic, and morphed into full mouth restorative, advanced esthetics, and surgical with emphasis on prosthetic rehabilitation.

Comprehensive Dental Care, Las Vegas, NV – Lead Assistant and Patient Concierge

2002-2009

- This practice was advanced cosmetic, neuromuscular orthotic and full mouth reconstruction, sleep, surgical, and fixed prosthetic practice. This was also a Front Deskless practice, so I was responsible for all aspects of my patients appointments from front to back.

Topeka Smiles, Topeka, KS – Lead Dental Assistant

1993-2002

- This was my very first dental practice I started at with no experience. It was in this general dentistry practice that I fell in love with dentistry and knew what my calling was at the young age of 19. This practice became a very busy practice that developed into a popular cosmetic and family practice.

Courses Taken

LVI

- Cosmetic Anterior Aesthetics
- Foundations in Diagnosing and Treating Complex Cases
- Core II Orthotic Maintenance, Adjustment, and Principles of Reconstruction
- Core III Mastering Dynamic Adhesion in Complex restorative Cases
